

Demography report 2021

24 June 2021

Please select any country or region, then obtain official demographic data, longitudinally if possible. Then conduct demographic analysis and describe its characteristics.

The easiest way to obtain data in R software is to use `wpp2019` package for the world, `fmsb` package for Japan. Anyway, you have to describe how to obtain the data with its source information.

More than 1 page pdf file should be attached on e-mail to minato-nakazawa@people.kobe-u.ac.jp.

Deadline is 29 July 2021.
